

Team Agreement

MIT Class: Principles and Practice of Assistive Technology

MIT class 6.811, Principles and Practice of Assistive Technology, is a term-long subject in which small teams of 3-4 students work with clients from the community. Each team works with one client to understand the client's needs and desires, and develop a series of ideas about assistive technology that may be useful to the client. Team activities begin in the middle of September, and run through the middle of December.

This form helps the student team members agree on their expectations for working together. Please discuss it and fill it out *together, as a team*, then return it to the PPAT staff. We will email each of you a scanned copy and retain the original.

For All Team Members to Read and Sign in One Another's Presence:

We, the undersigned student team members, understand and commit to the following:

- We will meet and communicate regularly and respectfully with each other as a team to advance this project.
- We commit to working with our client throughout the term, as described in the accompanying "Team-Client Agreement."
- We have identified (day, time) _____ as a regular meeting slot outside of lab.
