

## Drug List -- Final Examination

Once again, we are providing a list of drugs that we expect you to know by name for the final examination. This means that you should know general properties and mechanisms of action, but you will not be responsible for doses, half-lives, and similar detail. Any other drug appearing on the exam will be accompanied by information about its class or mode of action.

This list is a supplement to the one for the midterm exam. The final exam will cover the drugs listed on both handouts. Many drugs were discussed at several points during the course, so they may appear more than once on the list. Drugs stressed during case conferences are included. At this writing, all of the lectures and case presentations have not yet occurred, so I may have to add or subtract a drug or two.

**The examination is Mar 27, 9:00 - 12:00 a.m.**

---

### I. Histamine and Antihistamines

Diphenhydramine	Fenoxfenadine
Chlorpheniramine	Cimetidine
Promethazine	Ranitidine

### II. Antiinflammatory drugs

Aspirin	Misoprostol	Infliximab
Ibuprofen	Celecoxib	Methotrexate
Indomethacin	Sulfasalazine	
Naproxen	Etanercept	

### III. Lipid lowering drugs

Niacin	Cholestyramine	Lovastatin
Gemfibrozil	Colestipol	
Clofibrate	Sitostanol	

### IV. Antineoplastics

5-fluorouracil	Bleomycin	Doxorubicin
Cytosine arabinoside	Vincristine	L-asparaginase
6-mercaptopurine	Taxol	Prednisone
Methotrexate	Nitrogen mustard	Procarbazine
Folate	Cyclophosphamide	
Leucovorin	Cis-platinum	

### V. Antimicrobials

Penicillin	Clavulanic acid	Erythromycin
Methicillin	Imipenem-cilastin	Azithromycin
Ampicillin	Gentamicin	Vancomycin
Nafcillin	Streptomycin	Ciprofloxacin
Cefazolin	Chloramphenicol	Isoniazid
Sulbactam	Tetracycline	Rifampin

#### **VI. Psychoactive drugs, drugs for movement disorders and seizures**

Levodopa	Chlorpromazine	Valproic acid
Carbidopa	Thioridazine	Ethosuccimide
Bromocriptine	Haloperidol	Diazepam
Pergolide	Phenytoin	Midazolam
Selegiline	Fosphenytoin	Flumazenil
Trihexyphenidyl	Carbamazepine	Lithium
Amantadine	Phenobarbital	Fluoxetine
Entacapone	Primidone	Amitriptiline

#### **VII. Opioids and antagonists**

Morphine	Nalorphine	Enkephalin
Meperidine	Naloxone	$\beta$ -endorphin
Codeine	Naltrexone	Dynorphin
Oxycodone	Butorphanol	
Fentanyl	Buprenorphine	
Methadone	Dextromethorphan	

#### **VIII. Miscellaneous**

Timolol	Sodium Iodide	Trimethoprim
Acetazolamide	Propylthiouracil	Sulfamethoxazole
Pilocarpine	Acarbose	P-aminobenzoate
Echothiophate	Tolbutamide	Thalidomide
Colchicine	Glyburide	Folate
Allopurinol	Metformin	Leucovorin
Probenecid	Rosiglitazone	Ethanol
Hydralazine	Ergotamine	Disulfiram
Procainamide	Sumatriptan	Omeprazole
