Progress Report
Foshan, China 22 March 2004

麻省理工课题组规划流程

Study Procedure

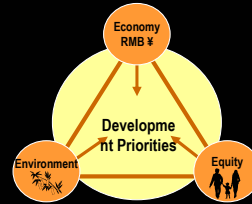

MIT Foshan Progress Report, March 22, 2004

课题目标

Project Objectives

- Enhance and complement plans from Sasaki and Foshan Officials
- Focus on sustainability – a balance of economy, environment and equity
- Develop a handbook of planning options

MIT Foshan Progress Report, March 22, 2004

挑战

Challenges to be Addressed

- Focusing on economic development as an imperative
- Connecting North (old part of the city) and South (new part of the city)
- Addressing land use concerns and land scarcity
- Defining Foshan's identity within the PRD
- Promoting "livability" and quality of life
- Incorporating environmental concerns

MIT Foshan Progress Report, March 22, 2004

What we have learned / interpreted from the several resources:

In our conversations with you (the planning directorate)

Consultation with other experts in Foshan

Consultation with China experts – Wei Ming Lu, Wallace Chang, etc.

Our review of Foshan's 5-year plan (the 10th 5-year plan) and Beijing's directives

-Economic development as an imperative

-Connecting North (old part of the city) and South (new part of the city).

-Land Use Concerns

Balance spatial distribution of development

Curbing urban sprawl

Maximizing available space

-Foshan's identity

Differentiation from Guangzhou

Reconciling history with the push for modernization

-Promoting livability

For residents, visitors and investors

Impact and importance of transportation

- **Environmental Concern**

Resource concerns

Impact of the environment on the quality of life
