

Class 8 - Criminal Justice

A series of horizontal lines in shades of teal and white, extending from the right side of the slide towards the center.

Agenda

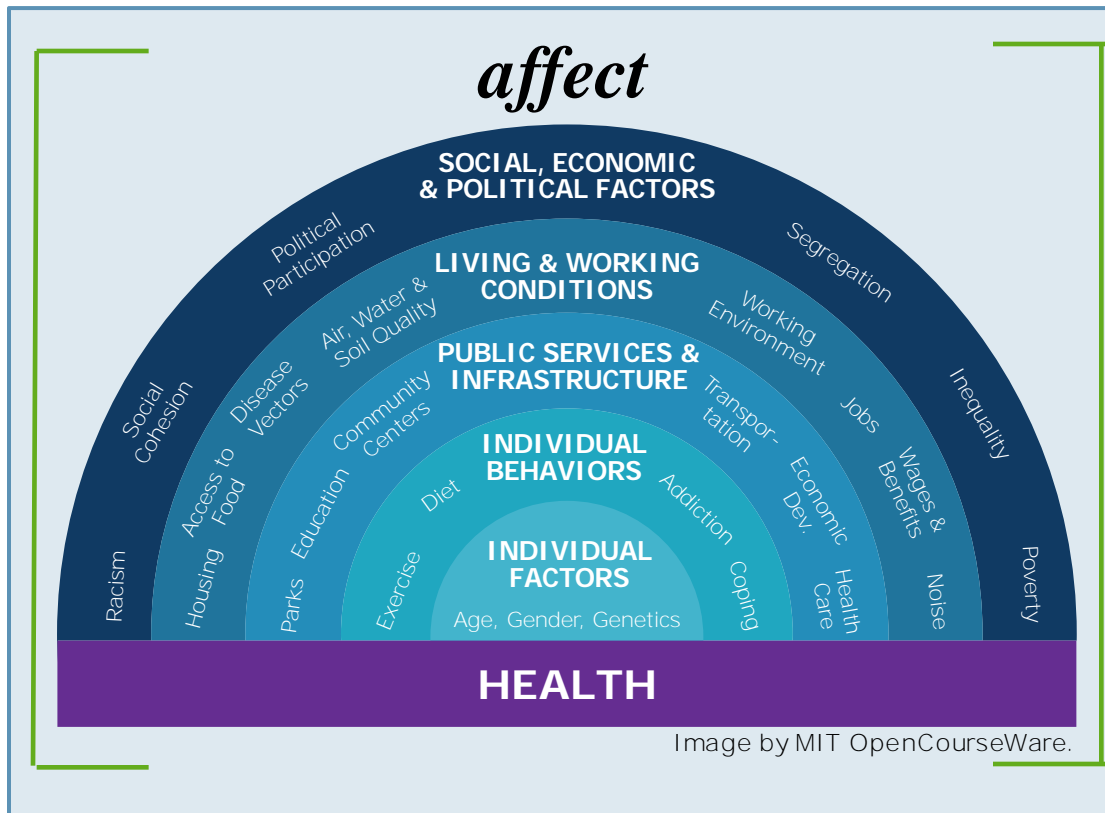

- Debrief from Thursday
- 33% check-in
- Criminal justice
- Next time

Where we've been

- Health as a social and biological phenomenon
- Ethical and philosophical underpinnings of public health
- Major causes of death and disease and the epidemiologic transition
- Health equity
- Social gradient in health: income, occupation/employment, education
- Race/ethnicity

Social determinants of Health

How do projects, plans, policies, laws, budgets

and lead to changes in health

Where we're going

- Criminal justice
- Neighborhoods – built and natural environment exposures
- Neighborhoods – social environment exposures
- Embodiment
- Policy implications

Where we've been

- What is HIA?
- Rapid training
- Screening exercise

Where we're going

- Scoping – present pathways 3/17
- Assessment
- Recommendations
- Communication
- Alternatives to HIA
- Future of HIA

The New Jim Crow

“More African American adults are under correctional control today- in prison or jail, on probation or parole- than were enslaved in 1850, a decade before the Civil War began.

Thousands of black men have disappeared into prisons and jails, locked away for drug crimes that are largely ignored when committed by **whites.”**

Implications for health

- Injury and death in jail, prison, or police custody
- Influx of mentally ill into prisons
- High rates of infectious disease inside prisons
- Exposure to violence, intimidation, dehumanization, solitary confinement, infectious agents, poor health care
- Barriers to employment, income, housing, political participation, fear, stigma
- Psychosocial implications for the public at large (even including corrections officers)
